Lily

Design: Runa Klock & Hallgeir Homstvedt

The Lily lamp represents a whole new perspective on acoustic products. Its noise-dampening feature – the moulded felt of which it is made – has been so thoroughly integrated that you don't even notice it.

Lily got its name from its early prototypes, which resembled water lily leaves. Since then, its shape has been simplified and made more open to interpretation. Still present, however, is the sense that the lamp is floating in the air, imbuing the room with a splendid stillness. A smaller version of Lily has been introduced for 2019.

Absorption

Materials and Sustainability

The absorbent is available in several different textiles and with two different cores: One with polyester and a self-developed filling we call Hemp which is based on renewable raw material from hemp and starch.

Lily is available with or without the actual lamp.

Lamp: 230V input / Around 10W 900-1100lm output / dimmable

CR180/2700K / Around 110 °

- No emissions to air, water or soil take place at Abstracta's factory during the production of Lily
- All materials in Lily are recyclable, either as material or energy.

Equivalent Sound Absorption Area
(m² Sabine)/Unit*

Measurements WxHxD (mm)

900 x 61 mm
1200 x 61 mm

Absorption:

Ø1200 N10=11 Utvärderad enligt ISO20189

Ø900 N10=11 Utvärderad enligt ISO20189
