

RONDEA-F

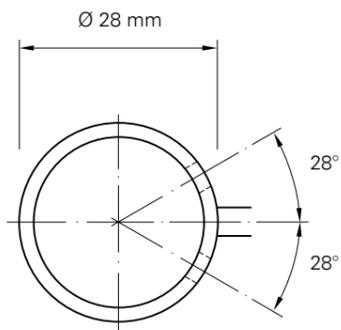

RONDEA-W

High transparency and visual lightness are characteristics of the shelving system

Rondea

With round tubes, a broad furnishing programs and two different design, the Rondea is both individual and adaptable.

Scale 1 : 1

Integrated book end-stop

End panels from perforated sheet metal, presentation grids, end wall shelves, levelled shelves, lettering signs etc. are only a small extract from the possible design and function options which this system opens up to the user.

Our accessory catalogue for Shulz Shelving Systems provides more information about additional furnishing options for the Rondea shelving system.

End wall furnishing

Perforated side panels with round holes RG 5/25

RONDEA

Transparent Elegance

High transparency and visual lightness are the characteristics of the shelving and furniture programme RONDEA.

Two different design variants take account of the individual demands for the furnishing of public libraries. Smoothly designed, without irritating edges and corners, the RONDEA-F variant can be integrated randomly into existing structures through its neutral appearance. Those who intentionally want to bring some fresh air with their new furniture will spontaneously like the dynamic variant RONDEA-W.

Our furniture programmes are demonstrating their flexibility during everyday use. The systems are widespread; all areas of use in a library can be well covered. The abundant range of accessories from our SchulzShelvingSystem Accessory Catalogue makes our programmes adaptable and allows for an uncompromising orientation towards all possible customer requests.

Function as well as quality, Schulz Shelving Systems have been designed for long-term use and for the high strains in library areas.

Best production standards, high resilience and highest quality levels – officially proven and confirmed - contribute significantly to the conservation of value of our furniture.

Colors and surfaces in accordance with the symbols on the Schulz ColorRange:

- Colors: **for lacquered metal or wood**
- Surfaces: **in wood or plastic**

Single-sided Bays

Single-sided starter bay RONDEA-F with frame traverse, without shelves

Lacquered metal, D 276 mm for shelf depth 250 mm = M

		Axle size 1000 mm	Axle size 900 mm	Axle size 750 mm	Axle size 500 mm

Equipment for Front-Sided Bays

Slanted shelves 60°

For the presentation of books, magazines etc.
For hanging on the front-sides of double-sided bays.
Lacquered metal; incl. hanging kit, W 469 mm

D 290 mm	Item no.	B 8222 0M0 RO
----------	-----------------	---------------

Front-side shelves

For hanging on front-sides of double-sided bays.
Lacquered metal; incl. hanging kit; W 469 mm, H 120 mm

D 250 mm	Item no.	B 8221 0M0 RO
----------	-----------------	---------------

Set of Castors for Double-Sided Bays

Set of castors for double-sided shelves

Can be easily retrofitted for double-sided bays with a shelf depth of 250 mm.
The special construction helps to avoid an uncomfortable offset in height with non-moving shelves; beyond that, the shelf also receives an additional horizontal stiffener.
Two set of wheels are required for basic shelves, one set for add-on shelves.
Angled sheet metal, lacquered; incl. fastening material and two wheels.
W 550 mm

Item no.	B 8013 0M0 RO	Standard type for PVC and carpet floors
Item no.	B 8013 0M1 RO	Variant type for wooden and stone floors

Metal Shelves

Metal shelf, including hanging kit

Lacquered metal

Presentation Grids

Labeling sign for presentation grids

Will be put on presentation grid as signpost and orientation guide; beech multiplex.
W 400 mm, H 284 mm

Item no. B 8202 000 RO

Presentation grid, straight

For fastening at front sides of double-sided bays with a shelf depth of 250 mm, as support system for presentation elements; see also Schulz Shelving Systems Accessory Catalogue.
Round steel, chromium-plated; incl. fastening material.
W 490 mm, H 1750 mm

Item no. B 8200 000 RO

Presentation grid, angled

Description as above, but with an expanded and angled presentation surface.
W 490 mm, D 522 mm, H 1750 mm

Item no. B 8201 000 RO

Description of System

Shelving system with framework construction for storing books, magazines and other printed media, as well as all other non-book media.

Bearing frames from round, diam. 28 mm, perforated interior shelf sides for tool-free adjustment of shelves with a 32 mm grid module. Depth connectors are available either as 4mm-thick metal plates or design pre-fab parts from flat metal.

Support feet equipped with leveling screws.

Longitudinal strut-bracing for shelves by diagonal traverses, individually screwed for each shelving section, Back panels upon request.

Mentioned axle sizes are nominal dimensions. A nominal axle size of 1000 mm is an actual axle size of 998 mm etc.

Shelves alternatively from wood or metal.

If desired, wooden shelves also available with chrome-plated, integrated book end supports.

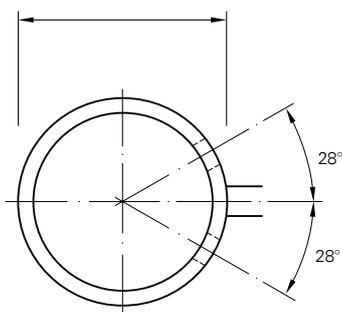

Metal parts are lacquered according to DIN 50942 with a particularly resistant, environment friendly stove-enamel powder coating.

Most of the metal fittings are chrome-plated and therefore have long-term corrosion protection.

Wooden surfaces have an environment friendly lacquering or are plastic coated.

Cross-Section

Round tubes diam. 28 mm

Scale 1:1

Just like the mechanics of a clock where many adjusted parts match with each other, a well thought-out and balanced programme of accessories is vital for the functionality and quality of library furniture.

The following overview will introduce you to our shelving systems for scientific and public libraries.

These systems form the basis for using an extensive and future-oriented range of accessories which we have compiled in this catalogue.

Information on colours and surfaces is in accordance with the SchulzColorRange:

● Colours
for metal and wood lacquering

■ Surfaces
wooden or plastic

✱ Materials/cloth
for seating furniture

UNIFLEX (UN)

This classic shelving and organizing system is built as frame construction from square steel bars and stands for proven quality in a timeless design.

UNIFLEX reveals its flexibility in daily use.

The extensive accessories and equipment programme enables an unconditional orientation towards all possible customer requests.

QUADRA (QU)

Our system QUADRA has an analogue construction, yet with square profiles, and has also been designed for long-term use in functionality and quality as well as for the very high demands and strains in libraries. You can choose between two different design options which will not only be functional but will set a trend in modern library furniture.

RONDEA (RO)

The elegant attitude of our shelving system RONDEA with round steel bars has been coined by reserve and transparency. The filigree construction emphasizes architecture and media. An extensive programme of accessories and two different design options make RONDEA quite adaptable.

Hanging Book Stops

Hanging book stop, Model BS 22

For insertion in metal shelves, easily adjustable, round steel, chromed, with unbreakable plastic sliders for an easy and quiet use.
H 220 mm

Fits all systems

For shelf depth 250 mm
For shelf depth 300 mm

Item no.

B 8002 M00 XX
B 8002 N00 XX

Hanging book stop, Model BS 28

For insertion in metal shelves with high shelf distances, similar to model BS 22, also suitable for books with extremely large format or very small books through its extra size
H 280 mm

Fits all systems

For shelf depth 250 mm
For shelf depth 300 mm

Item no.

B 8002 M28 XX
B 8002 N28 XX

Divider, Model TS

For sliding upon hanging book stops, model BS 22 and BS 28. The divider lies directly upon the shelves through its own weight and is a valuable accessory part for loose-leaf collections, brochures, music books etc.
White plastic.
D 240 mm, H 250 mm

Fits all systems

For shelf depth 250 mm and 300 mm
XX

Item no.

B 8005 M00

Hanging book stop, Model HB 22

For insertion in Multiplex-wooden shelves with guiding grooves for book stops, easily side adjustable, chromed round steel.
H 220 mm

Item no.	For axle size 1000 mm
Fits all systems	B 8322 0W0 XX

Newspaper and Magazine Presentation

Continuous magazine flap, Model DZK

You can display three current titles, the previous versions are stored behind – broadside on the shelf. Broadside stacking has the great advantage that all inscriptions and prints on the spine can still be seen from the front. An effective lever mechanism supports the comfortable handling and keeps the lifted flap open. Easily retrofitted for single- and double-sided bays with axle size 1000 mm and a shelf depth of 250 mm. In order to prevent a slip-through to the back, we recommend using shelves with backs. Shelves H 2250 mm can be equipped with max. 6 flaps high. Stacking height for German DIN A4: 160 mm.

- Flap and sides from lacquered metal, W 961 mm, H 340 mm, without shelf

LED presentation board

Are you proud of your new acquisitions, or would you like to present different types of media on one specific topic? Our LED presentation board offers you the appropriate frame. It has a perforated metal front which can be equipped and individually combined with all kinds of presentation accessories.

State-of-the-art LED technology will definitely attract the visitors' attention, with a minimum of electricity consumption and extreme durability.

This LED presentation board is also well suitable to brighten up some less frequented dark corners, niches and hallways.

Comes with 29 LEDs, ready for operation, incl. plug and cable for 250V socket.

Perforated sheet metal, lacquered; with put-on sign for lettering upon request.

Colour Range

Colours carry a large expressiveness and are effective at first sight. Particularly in architecture does colouring play an important role. We are offering you the possibility of individually combining different surfaces with an extensive colour programme in order to design your furniture.

We furnish libraries!

The centre of all our activities is you, our customer. Your satisfaction is our most important capital. In order to find your individual solution we already support you during the planning phase. If you are looking for competent consulting, We are there for you, also on the spot. Tell our specialists about your needs and use our know-how from many a thousand realised furnishing projects.

Our name stands for innovative product design and development. Furniture for today and tomorrow. And being an all-round equipper we offer a complete delivery programme for all kinds of libraries.

Besides the library furniture presented in this catalogue, you will find more product groups like shelving systems and shelving accessories as well as counter systems in separate catalogues or under www.schulzspeyer.de.

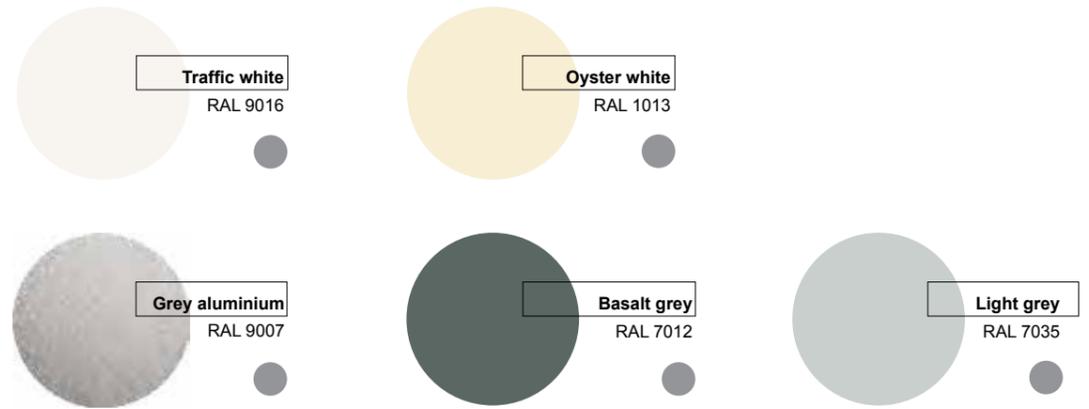

We are looking forward to your inquiries.

Colours for metal coatings

The coloration of the metal parts is made by a highly abrasion-proof and environmental-friendly baking powder-coating. With reservation for colour deviations to original RAL register. Antibacterial equipping of surfaces upon request.

Surfaces from solid wood veneer and plastic

Wooden surfaces are either directly plastic-coated or covered with an HPL laminated plastic, depending on their application. Differences in colour underline the characteristics of solid wood surfaces and cannot be avoided. Solid wood changes its colours under the influence of light. Table and work surfaces with solid wood veneer have only limited abrasion resistance. We recommend our highly resistant plastic decors for these types of surfaces. We use environmental-friendly lacquers for our solid wood surfaces.

RAL 5003 Sapphire blue
RAL 9011 Graphite black
DB 702 Iron mica light
DB 703 Iron mica dark
Other colours, fine structures and glimmer lacquerings upon request.

(1) We do not recommend fine-structured surfaces for shelf boards as the books will slip easily!

Other surfaces and veneers upon request.
